EXPERIENCE

Full Stack Engineer

June 2025 – June 2026

Inlighnx Global (Inlighn Tech)

Remote

- Optimized a PostgreSQL-backed order-processing service by redesigning query indexes and introducing Redis caching, cutting API latency by **45%** and eliminating peak-hour timeouts
- Designed a microservices-based backend handling **100K+** daily REST API requests, increasing system throughput by **60%** by re-architecting a synchronous notification pipeline into an event-driven workflow using BullMQ
- Cut deployment time by **70%** by migrating manual release workflows to automated CI/CD pipelines on AWS using Docker, Kubernetes, Terraform, ArgoCD, and GitHub Actions, enabling multiple daily production releases
- Raised production uptime to **99.9%** by building a centralized observability stack with distributed logging, health checks, and real-time alerting via Prometheus and Grafana, cutting incident response time by **50%**
- Secured platform APIs by designing a JWT/OAuth-based authentication system with RBAC, rate limiting, and Zod schema validation, closing multiple authorization vulnerabilities identified during a security review
- Built an AI-powered support automation feature using Google Gemini, LangChain, and a RAG pipeline over a vector database, enabling real-time context-aware responses for end users

PROJECTS

StudyMint AI | *React, TypeScript, Node.js, Express, MongoDB, Gemini* | [GitHub](#) · [Live](#)

- Built an AI-powered exam notes generator used by **100+** active users, transforming any topic into structured exam-ready notes using Google Gemini
- Architected a full-stack system with a Node.js/Express REST API, MongoDB persistence layer, and Zod-validated schemas, and integrated Razorpay for secure subscription billing
- Automated build and release pipelines with GitHub Actions to deploy Dockerized services on AWS ECS/ECR, enabling reliable, zero-downtime production releases

SupportMint | *Next.js, Node.js, Express, MongoDB, Gemini* | [GitHub](#) · [Live](#)

- Engineered an AI-powered customer support platform enabling businesses to reduce repetitive queries through custom, context-aware chatbot automation
- Architected a Next.js frontend with a Node.js/Express backend and MongoDB data layer, integrating Google Gemini to generate real-time, context-aware responses tailored to each business's knowledge base
- Deployed on AWS ECS behind an ALB with health checks and zero-downtime rolling deployments.

SpeakUp | *React, TypeScript, Node.js, Express, PostgreSQL, Prisma* | [GitHub](#) · [Live](#)

- Developed a secure crime-reporting platform that streamlined anonymous complaint submission and administrative case tracking through role-based workflows
- Implemented a PostgreSQL/Prisma backend with RBAC-driven access control and integrated secure Cloudinary evidence uploads using JWT authentication
- Containerized services with Docker and set up centralized logging and monitoring on AWS ECS, improving visibility into production issues and reducing debugging time by **35%**

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux, TanStack Query, Zustand, Tailwind CSS, Framer Motion, GSAP

Backend: Node.js, Express.js, REST APIs, WebSockets, WebRTC, Kafka, BullMQ, JWT, OAuth, Zod

Databases: PostgreSQL, MongoDB, MySQL, Redis, Prisma

AI: Google Gemini, OpenAI API, LangChain, LangGraph, RAG, Vector Databases

DevOps & Cloud: AWS (ECS, ECR, EC2, S3, IAM, EKS, CloudWatch), Docker, Kubernetes, Terraform, ArgoCD, CI/CD, GitHub Actions, Nginx, Prometheus, Grafana, Git, GitHub

Architecture: System Design (HLD/LLD), Microservices, Event-Driven Architecture, Distributed Systems

EDUCATION

Institute of Information Technology & Management (IITM)

Delhi, India

Bachelor of Technology in Computer Science and Engineering

Aug. 2021 – May 2025

CERTIFICATIONS

[IBM JavaScript Backend Developer](#) | [IBM Applied DevOps Engineering](#) | [Google Generative AI Leader](#) | [Meta Front-End Developer](#)
