## EXPERIENCE

### Software Engineer

June 2025 – June 2026

*Inlighnx Global (Inlighn Tech)*

*Remote*

- Eliminated peak-hour checkout timeouts and improved customer retention on the order-processing flow by slashing API latency **45%**, redesigning PostgreSQL indexes and introducing a Redis caching layer for high-read endpoints
- Scaled platform to handle **100K+** daily REST API requests by re-architecting a synchronous notification pipeline into an event-driven workflow with **BullMQ** and **Node.js** microservices, lifting throughput **60%**
- Closed **2** authorization vulnerabilities flagged in a third-party audit by architecting a **JWT/OAuth 2.0** authentication layer with **RBAC**, rate limiting, and **Zod** schema validation across all public APIs
- Automated deployment pipelines on **AWS** using **Docker**, **Terraform**, **ArgoCD**, and **GitHub Actions**, enabling multiple daily releases and reducing deployment time **70%**
- Raised production uptime to **99.9%** and shrank mean-time-to-resolution **50%** by building a centralized observability stack with **Prometheus**, **Grafana**, distributed logging, and automated health checks
- Deflected **70%** of support tickets by architecting an AI-powered automation feature with **Google Gemini**, **LangChain**, and a **RAG** pipeline over a vector database, powering real-time context-aware responses

## PROJECTS

### StudyMint AI | *React, TypeScript, Node.js, Express, MongoDB, Gemini* | [GitHub](#) · [Live](#)

- Grew to **100+** active users with a **React/TypeScript** AI notes generator, converting any topic into exam-ready notes via **Google Gemini**
- Monetized the platform via **Razorpay** checkout integration, backed by a **Node.js/Express/MongoDB** API with **Zod**-validated schemas
- Shipped zero-downtime releases via automated **GitHub Actions** pipelines deploying Dockerized services on **AWS ECS/ECR**

### SupportMint | *Next.js, Node.js, Express, MongoDB, Gemini* | [GitHub](#) · [Live](#)

- Reduced **90%** of repetitive support tickets for client businesses with a **Next.js** AI chatbot platform delivering embeddable, branded widgets
- Personalized real-time replies by integrating **Google Gemini** across a **Node.js/Express/MongoDB** backend per business knowledge base
- Maintained **99.9%** deploy reliability on **AWS ECS** behind an **ALB** with automated health checks

### SpeakUp | *React, TypeScript, Node.js, Express, PostgreSQL, Prisma* | [GitHub](#) · [Live](#)

- Streamlined secure, anonymous crime reporting via a **React/TypeScript** UI with role-based dashboards for **200+** users tracking cases in real time
- Locked down role-scoped access with **RBAC**, **JWT** auth, a **PostgreSQL/Prisma** backend, and encrypted **Cloudinary** evidence uploads
- Trimmed debugging time **35%** by containerizing services with **Docker** and centralizing logging/monitoring on **AWS ECS**

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, SQL

**Frontend:** React.js, Next.js, Redux, TanStack Query, Zustand, Tailwind CSS, Framer Motion, GSAP

**Backend:** Node.js, Express.js, REST APIs, WebSockets, WebRTC, Kafka, BullMQ, JWT, OAuth, Zod

**Databases:** PostgreSQL, MongoDB, MySQL, Redis, Prisma

**AI:** Google Gemini, OpenAI API, LangChain, LangGraph, RAG, Vector Databases

**DevOps & Cloud:** AWS (ECS, ECR, EC2, S3, IAM, EKS, CloudWatch), Docker, Kubernetes, Terraform, ArgoCD, CI/CD, GitHub Actions, Nginx, Prometheus, Grafana, Git, GitHub

**Architecture:** System Design (HLD/LLD), Microservices, Event-Driven Architecture, Distributed Systems

## EDUCATION

**Institute of Information Technology & Management (IITM)**

Delhi, India

*Bachelor of Technology in Computer Science and Engineering*

*Aug. 2021 – May 2025*

## CERTIFICATIONS

**IBM JavaScript Backend Developer** | **IBM Applied DevOps Engineering** | **Google Generative AI Leader** | **Meta Front-End Developer**
